

DYSPEPSIA-PROOF.

HOW ANY MEAL CAN BE THOROUGHLY ENJOYED BY ANY STOMACH.

Costs You Nothing to Try Stuart's Dyspepsia Tablets.

Men, as a rule, are first discovered by their enemies. Their antagonists turn on the searchlight, and the proof of merit will lie in being able to stand the flash.

It was only in this way that Mr. White ever knew that dyspepsia was one of Mr. Black's worst enemies. Sitting face to face at a two-by-four table, he handed his afflicted friend the bill of fare:

Oyster Cocktail. Stuffed Olives.
Boston Clam Chowder.
Strained Gumbo.
Sirloin Steak with Mushrooms.
Roast Beef Hash.
Boiled Ox Tongue with Sauerkraut.
Lobster a la Newburg.
Baked Pork and Beans.
Combination Crab Salad.
Hot Mince Pie.
Pineapple Fritters.

Mr. White ordered a "little of each." Mr. Dyspepsia Black ordered crack-ers and a glass of milk. "I had such a big breakfast this morning," he said, "that I'll just take a bite to keep you company." But Mr. White could not be deceived: "I am afraid you can't stand the gleam, Mr. Black. Why don't you say you have dyspepsia and be done with it? You'll always have that hungry look anyhow as long as you have dyspepsia. Now listen. My stomach was in just as bad condition as yours at one time. But now I can eat anything at any time. For instance, this clam chowder or sirloin steak or even the lobster would be just as welcome to my stomach as your crackers and milk. You don't realize how this dyspepsia business is robbing you of your spirit, of your energy and ability to think quickly. I can't help notice it. You haven't the cheer and sociability you had three months ago. Now I'll tell you what to do," and then he took a cheerful Mr. White took a vial from his pocket and extracted a wee tablet. "There, there is a tablet that contains an ingredient, one grain of which digests 3,000 grains of food. For even the worst dyspeptic it's the only thing that really gives relief. The reason is it relieves the stomach of nearly all the work it has to do, digests everything in the stomach and stimulates the gastric juice. I can't get along without them. They are Stuart's Dyspepsia Tablets. You can get them anywhere on earth for 50c a package."

Yes, it is true, Stuart's Dyspepsia Tablets absolutely stop heartburn, nausea, indigestion, dyspepsia of the worst type, sour stomach, bloaty feeling and all eruptions and irritation, and freshen and invigorate the stomach. They cheer you up, and make you get all the good there is in your food. You will forget you ever had a stomach to worry you.

Send us your name and address today and we will at once send you by mail a sample package, free. Address F. A. Stuart Co., 150 Stuart Bldg., Marshall, Mich.

THE ANNUAL ELECTION OF OCCIDENTAL LIFE

M. W. Flournoy Chosen President to Succeed Lloyd B. Christy.

Official announcement is hereby made of the election of Mr. M. W. Flournoy, for the past four years first vice president, to the office of president, by Mr. Frank McKee, who has been treasurer of the company since its incorporation, vice president, and Mr. M. J. Riordan and Mr. H. F. Reynolds as members of the board of directors, to the board of directors to fill vacancies caused by the retirement of Mr. Joshua S. Reynolds and the resignation of Mr. Lloyd B. Christy, says the Albuquerque Tribune-Citizen.

These important changes in the organization of the Occidental Life Insurance company were effected on January 17, 1911, at the annual meeting of the stockholders and board of directors, respectively. They are in line with the Occidental's traditional policy of pre-eminence in the selection of its officers—of men who are thoroughly trained and competent for the important duties of the same.

Mr. Flournoy's wide and various experience with the details of the Occidental's rapidly growing business as vice president, together with his enthusiastic devotion, to which the perpetuation and extension admirably equipped him for the broader field of work devolving upon him as president.

Mr. Flournoy's more than twenty years' connection with the First National bank of this city as its vice president and general manager and which has become, under his superior judgment, the largest and most successful banking institution in the southwest, has thoroughly equipped him for the important duties of supervising the handling and investing of the rapidly growing funds of the Occidental Life Insurance company.

Mr. M. J. Riordan is a well known capitalist of Arizona, and one of the most successful business men in that territory.

Mr. Frank McKee is so well known as a successful banker and business man throughout the two territories that anything that might be added would appear superfluous.

Mr. H. F. Reynolds is one of the rising attorneys and business men of the southwest, whose sound business judgment will add materially to the officers of the company in making the Occidental one of the largest financial institutions in the southwest. The company is to be congratulated upon having secured the able services of these gentlemen, who in the future will take an active part in its growth and progress.

The officers of the company that will hold over are as follows: Solomon Luna, vice president; J. H. O'Reilly, secretary and general manager; George Roslington, assistant secretary and actuary; A. B. McMillen, general counsel; J. H. Wroth, medical adviser; J. A. Reidy, assistant medical adviser. Directors—H. F. Reynolds, M. W. Flournoy, Solomon Luna, A. B. Mc-

Millen, M. J. Riordan, Frank McKee, J. H. Wroth, George Roslington and J. H. O'Reilly.
Executive Committee—M. W. Flournoy, A. B. McMillen, Solomon Luna, J. H. O'Reilly, George Roslington.

A MANDAMUS SUIT AGAINST SUPERVISORS

Dr. Sargent Begins Action to Secure Contract for County Physician.

Dr. William H. Sargent yesterday began mandamus proceedings against the board of supervisors to compel the board to award him the contract for the care of the indigent sick of this county under the bid submitted by him in response to an advertisement for bids. It is stated in the complaint that there were three bidders: the plaintiff, whose bid was \$740; Dr. Grant S. Monical, \$790, and Dr. R. M. Tafel, \$850. The contract was awarded to the last named. The alternative writ has not yet been prepared.

The action is similar to one brought against the board a year ago by the Phoenix Printing company, an unsuccessful bidder for the printing contract which had been awarded to the H. H. McNeil company. In that case the bids each included various items. As to some of them the bid of the plaintiff was lower and in other the bid of the McNeil company was lower.

The court held that the contract should have gone as to each item to the lower bidder, so the contract under the order of the court was divided.

SCIENTIFIC MISCELLANY.

It has been slowly brought to our understanding that the world is not the same to all creatures, and probably no experiments have tended more to make this clear than the recent ones by Prof. Karl Hesz of Wurzburg on the color-sense of chickens, pigeons, owls and kestrels. Men with hungry chickens and pigeons were first kept an hour in a bright room to become accustomed to the light. The floor was then spread with a smooth black cloth evenly covered with grains of wheat, a strong spectrum was thrown on it from the ceiling and the hungry animals were turned loose. They picked the wheat first from the bright red, then the ultra-red, next the yellow, and finally the green. They touched nothing in the blue and violet because they saw nothing, but, on the other hand, they saw the grains in the ultra-red that were invisible to the men. This proved that for chickens and pigeons the spectrum is shortened at the violet end of short wave-length and extended at the red end of long wave-length. This is the effect one might expect from wearing orange-colored glasses, and Hesz demonstrated that fowls see through such spectacles in the form of yellow and orange oil globules imbedded in the light-sensitive iris. To kestrels and buzzards the brightest zone was the green instead of red, the blue being visible. To owls the colors were as men see them.

The telephone disinfector of B. F. Gardner of Chicago, is an arrangement for producing electric sparks in the mouthpiece. Wires projecting through the walls of the mouthpiece are connected with a secondary coil wound on the finger frame, and this causes sparks when the alternate ringing current is sent out on the line to ring the bell.

The "rolling tanks" of Frahm, the Hamburg engineer, have reduced the roll of vessels from 11 degrees on

"Lame Leg Well"

"I wish to say that I have used Sloan's Liniment on a lame leg that has given me much trouble for six months. It was so bad that I couldn't walk sometimes for a week. I tried doctors' medicine and had a rubber bandage for my leg, and bought everything that I heard of, but they all did me no good, until at last I was persuaded to try Sloan's Liniment. The first application helped it, and in two weeks my leg was well."—A. L. HUNTER, of Hunter, Ala.

Good for Athletes.
Mr. K. GILMAN, instructor of athletics, 417 Warren St., Roxbury, Mass., says: "I have used

SLOAN'S LINIMENT

with great success in cases of extreme fatigue after physical exertion, when an ordinary rub-down would not make any impression."

Sloan's Liniment has no equal as a remedy for Rheumatism, Neuralgia or any pain or stiffness in the muscles or joints.

Prices, 25c., 50c. & \$1.00

PERSONAL INSPECTION

Of The Lands Advertised Below Is Their Best Recommendation

We Will Gladly Furnish Further Information Regarding Them, and Will Arrange to Show Them to Interested Parties at Any Time

Tempe

A good ranch for a home-seeker, 50 acres, a mile and a quarter from Tempe, strictly fine garden loam, at \$125 per acre. All Class "A." Fenced and cross-fenced; 2 houses, good shade, fine domestic water. One-third cash, balance on long time. No. 1009

Buckeye

An all-in-good-alfalfa forty near Buckeye for \$200.00 per acre. Will pay big interest on twice the price asked, and has netted more than that for the past three years. Terms to suit purchaser. Fenced. One of the best forties in the United States. No. 116

Glendale

40 acres, one mile south of the Beet Sugar town, all Glendale loess, all in cultivation, part in alfalfa, small house, shade, etc. \$175.00 per acre, on reasonable terms. This has been well kept up and should prove a big money-maker for the right man. No. 541

Phoenix

\$130 per acre, on exceptionally easy terms, buys a fine 25-acre tract. All in wheat; should net over \$25 per acre. Splendid grain and alfalfa land. Some shade. In rapidly developing neighborhood, only 3 1/2 miles from Phoenix P. O. All class "A" water. No. 91-B

Buckeye

140 acres of good land, lies very well, 2 miles from Buckeye P. O. Full water rights in Buckeye canal; all assessments paid to date. Can be bought at less than \$75.00 per acre. No. 844

Glendale

10 acres and good four-room house, stable, chicken house, woven wire fenced; about 3-4 mile from Glendale Post Office. Easy payments will take this, one of the best small buys we have. \$2,500 is the price. No. 116

Mesa

80 acres, about 3 miles S. E. of the Gem City, 50 acres being in alfalfa, balance in grain. Has been farmed right and is in excellent condition. A good farm house, has lots of shade and a nice home orchard. One-third cash, balance on time. \$150 per acre. No. 780

Tempe

40 acres of excellent soil, located 6 miles southeast of Tempe, all in grain, all Class "A" water; also Tempe pump water. Fenced. At the special quick-sale price of \$100.00 per acre, we consider this one of the best buys in the Salt River Valley. No. 1106

each beam to two degrees. U-shaped tanks extend from port to starboard through the hold, and the rise and fall of the water in them neutralizes the rhythmic movement as the ship rolls.

In a novel theory of Marx, Prof. Svante Arrhenius rejects Prof. Lowell's view that the changing dark spots and bands are due to vegetation, and accepts the old suggestion that the so-called canals are long, deep fissures. Similar formations exist on the earth, one extending a distance of 2,200 miles along the coasts of Peru and Chile. Water is supposed to collect in the fissures or canals and to accumulate especially at the points where several meet, these "lakes" of Schiaparelli, or "oases" of Lowell being explained as places where the planet's crust has sunk. Though very salt, the water is frozen by the intense cold. The ice evaporates in the dry air, the vapor collects as snow at the winter pole, and the canals become beds of dry salts, until, with the melting of the snow in spring and summer, the air ceases to be dry, and the salts again attract moisture, turning to a darker hue. Among objections offered to the new theory is that it does not satisfactorily account for the complete winter disappearance of the canals, which if really fissures, should remain visible throughout the year.

Plantations of the rain tree of Peru, the lampros, are claimed to offer great possibilities as irrigation works. The tree grows readily in any soil, reaching large size, and has a luxuriant foliage, with a remarkable power of collecting and condensing atmospheric moisture. Its capacity, moreover, is increased by the usual heat of a drought. The water falls from the leaves and oozes from the trunk, and forms veritable rivers, which can be led as irrigating canals to any point desired. A single tree is estimated to average nine gallons of rain a day. Making liberal allowance for evaporation and infiltration, a square mile grove of the trees would supply for distribution about 100,000 gallons of water daily.

The crumbling of building stones is another form of decay that we are to attribute to the action of microscopic organisms. At a recent museum conference at York, England, Dr. T. Anderson showed that stone decay is not due to wind action, and expressed the belief that it is not surface action at all, but a kind of rot produced by some low form of life like the moulds and fungi that rot wood, canvas and other vegetable materials. Treatment based on abrasion or chemical theories having failed, he sought a cure of the stones by the use of various germicides. The result has been an attract moisture, turning to a darker hue. Among objections offered to the new theory is that it does not satisfactorily account for the complete winter disappearance of the canals, which if really fissures, should remain visible throughout the year.

teachers," says Judge Simpson S. Ford. "A schoolmate of mine was due for a 'hiding' one time and prepared for it by putting on three extra suits of underwear and two extra pairs of trousers before he started for school."

"Our teacher's eagle eye was quick to note George's astounding increase in bulk. It was a raw day in February, and there was a roaring fire blazing in the big stove. 'When the time came for George to get his dues the teacher said, quietly, 'George, you will go over by the stove and stand up until I tell you to return to your seat.' 'George obeyed and in about ten minutes he was mighty sorry that he hadn't taken the whipping he had expected to get, instead of the roasting he was getting. George stood by that red hot stove for two hours and was the most thoroughly 'cured' offender against school discipline have ever known.'—Cleveland Plain Dealer.
